The assignment activity module enables a teacher to communicate tasks, collect work and provide grades and feedback.

Students can submit any digital content (files), such as word-processed documents, spreadsheets, images, or audio and video clips. Alternatively, or in addition, the assignment may require students to type text directly into the text editor. An assignment can also be used to remind students of 'real-world' assignments they need to complete offline, such as art work, and thus not require any digital content. Students can submit work individually or as a member of a group.

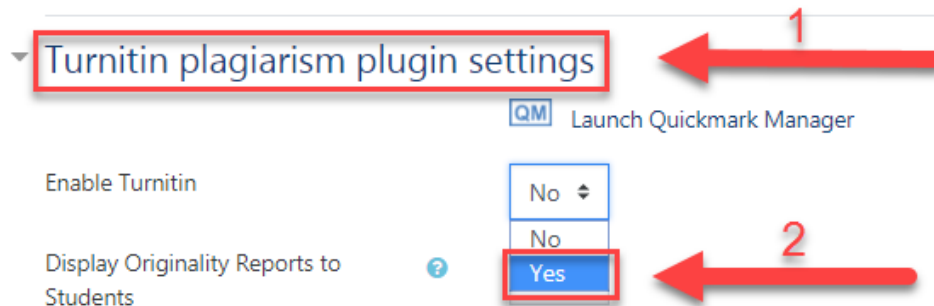

When reviewing assignments, teachers can leave feedback comments and upload files, such as marked-up student submissions, documents with comments or spoken audio feedback. Assignments can be graded using a numerical or custom scale or an advanced grading method such as a rubric. Final grades are recorded in the gradebook.

4. Give your assignment a name, add the details, scroll down to **Turnitin plagiarism plugin**

## Using Turnitin to Teach Writing

If you'd like to use Turnitin as a formative tool where your students can check for accidental plagiarism by submitting their drafts to the system, you must pay attention to these settings.

1. Set **Originality Report to Students** to: Yes
2. Set **Store student papers** to: No repository
3. Set **Report generation speed** to: Generate reports on due date (students can resubmit until due date)
